

**Procedure of Our Environmental Medicine / INUSpheresis® Therapy.**

1. We will welcome you to our clinic.
2. In a first interview with an environmental specialist, conducted in a relaxed atmosphere, you will describe your problems and express your wishes. We will take your initial history and evaluate your questionnaires. You will also be informed on the INUSpheresis® therapy, and can ask questions about it.
3. After that, our staff will register your data and perform the necessary pre-examinations like blood pressure measurement, ECG, taking of blood samples. You will receive your treatment contract and your cost estimate.
4. Our chief physician will analyse the evaluations, and examine you. In a second interview, he will explain the results to you, and determine the settings for your INUSpheresis® therapy. He will gladly answer your questions.
5. Now, your therapy can begin. Please bring along comfortable clothes (jogging suit, leisure suit, etc.) because you will be required to lie down for approx. 2 to 3 hours.
6. After the therapy, you will have time to relax, and have a meal and a drink in our own restaurant. Then, you can return to the hotel.
7. The next day, you will undergo a follow-up examination. Our specialist will again explain the results to you, and establish a supplement and medication schedule for 6 to 12 months.
8. When the laboratory results are available, you will be e-mailed a doctor's report in English and, if necessary, an adapted schedule. You can then contact us by phone.

If you have any queries, please do not hesitate to contact our English-speaking service: 0049-9971-2003213. Mr. M. Salafia will gladly answer all your questions.

For enquiries by e-mail, please use the following e-mail address: [info@inus.de](mailto:info@inus.de)

We would be delighted if you decided to undergo a therapy in our center.
